Summary

Senior Product Designer specializing in **AI-driven user experiences**, data-informed product strategy, and scalable design systems. A proven leader with 8+ years of experience turning complex **Enterprise B2B** and **Consumer Mobile** challenges into intuitive, high-craft solutions. Passionate about mentoring designers, leading teams, and shipping impactful products from 0-to-1.

Professional Experience

Independent Product Designer & AI Strategist, | SF Bay Area (Remote) | July 2025 - Present

- Leading the end-to-end design and product strategy for **0-to-1 micro-SaaS applications**, from initial user research and validation to hands-on design and front-end prototyping.
- Focusing on **AI-driven user experiences**, experimenting with emerging technologies and new interaction models to create intuitive and powerful tools for business and consumer users.
- Providing freelance design strategy and UX consulting for early-stage startups, helping them define their product vision and establish foundational design systems.

Stellar Cyber, San Jose, CA | Product Designer | Jan. 2023 – July 2025

- Boosted analyst productivity by **50%** by leading the end-to-end design of an **AI-powered copilot**, which simplified a complex data investigation workflow.
- Reduced configuration-related support tickets by **30%** by designing the platform's **multi-tenant administrative tools**, simplifying complex workflows for user management and role-based access control.
- Elevated the team's design craft by mentoring junior designers and establishing a new design critique process, leading to more consistent and higher-quality outputs.

Amazon Books Studio (contract), Remote | UX Designer | Jul 2022 – Oct 2022

- Lifted user engagement by **15%** by owning the end-to-end design of **consumer-facing mobile experiences** across iOS, Android, and Kindle for a catalog of over 44M+ items.
- Successfully navigated a complex, high-bar environment by presenting designs to and incorporating feedback from **senior leadership and multi-level design review panels**.
- Championed a high bar for quality by ensuring all final designs met **WCAG accessibility standards** to create an inclusive and scalable user experience.

Cisco, San Jose, CA | Product Designer, Mass Infrastructure Group | Dec 2017 – Feb 2022

- Accelerated development cycles by **25%** by leading the development and scaling of a **comprehensive design system**, which standardized UI components and patterns for 5 product teams.
- Reduced customer configuration time by **30%** by owning the UX for a complex **enterprise automation platform**, simplifying intricate B2B workflows.
- Designed high-frequency monitoring dashboards for technical users, focusing on strong visual hierarchy and data visualization to improve clarity and speed.
